

Agent X automates a range of marketing tasks.

Combine & chain these tasks together... to make money. Simple!

But one question I'm often asked is:

"Where do I get started!?"

Now the truth is, there are a million different ways to use Agent X.

You can profit with **A + B + C** - or **B + D + K**

I advise you use them all - but it also comes down to your personal preferences:

- *Want to sell your own product, or promote other's offers - as an affiliate?*
- *Want to operate in the marketing niche - or do something different?*
- *Don't want to sell anything at all? Prefer to build an audience with content?*

Here I'm going to outline 3x core systems that make money, all proven.

Agent X automates the bulk of these tasks, with more coming online all the time.

OK, here are the systems...

NOTE: Launch the tasks on <https://ubub.com> and see the training videos at <https://agentxhelp.com> for specific info on how to use each task...

SYSTEM A) RANK FOR REVIEW KEYWORDS ON YOUTUBE

The simplest system of them all.

You will easily create review videos that rank on YouTube, and make commissions when people buy through your link.

Every day there are new products launching on sites like WarriorPlus.

You can either find these on a site like <https://muncheye.com> - or ask the iphone app (which you can request from support@getagentx.com) what's coming out.

Then, you will setup a YouTube channel and do the following:

1. Create a 1-click affiliate review video with the "**Create Affiliate Review Video (1-Click)**" task

2. Upload the video to YouTube with the title as "[Productname] review" and a description like this:

Welcome to my review of Productname, a great new software by [person who made it].
To get productname now, simply go to [<https://your-affiliate-link.com>]

Optional:

- To make better videos, create your video in steps using the "**Create An Affiliate Review Script**" and then "**Build Text-Slide Video From Script**" tasks

- Consider adding visuals to the videos using the "**Create & Research Videos (To Add To Text Video)**" and "**Dalle**" or "**Leonardo**" tasks to make the visuals, then the "**Create Media Selector Page - Step 3**" and "**Layer Visual Media Onto Slide Video - Step 4**" tasks to layer those visuals on top of the video.

SYSTEM B) CREATE A WEBSITE WITH SEO CONTENT

Agent X also creates awesome articles, using the "**Create Video Script - Step 1 (or Google SEO Article)**" task.

And you of course get the free website with Agent X, which you can redeem as discussed in the quickstart guide here:

<https://getagentx.com/welcome/agentx-v2-welcome.pdf>

Once your website is setup, go ahead and do the following:

1. Start by running the "**Research YouTube Video Content Ideas**" task to brainstorm ideas for content (the video ideas will also be great article ideas).

2. Run the "**Create Video Script - Step 1 (or Google SEO Article)**" task to create an article.
3. Add your article to your website to start ranking.

SYSTEM C) SELL YOUR OWN DIGITAL PRODUCT

My favorite method of all! Here we are going to create a software product and sell it via a sales page.

Here's how to do this:

1. Firstly, create your software tool. This is going to be an Agent X task very soon, but for now you can use Infinite Ai to create your software. Here's complementary access to Infinite AI:
<https://profits.ac/members/infinity-pro-download.html>
2. Secondly, create your sales page. To do this, use the "**Build FULL Sales Page - Step 1 *PRO***" task to create your sales page - and then the "**Complete FULL Sales Page - Step 2 (Select & Save)**" task to combine the blocks you select for your sales page into a finished document.
3. Create your VSL video. Your page is almost ready, but just needs a VSL video to sell it. So run the "**Write VSL Script (For Sales Video)**" task to make your video script, then turn it into a finished video using the "**Build Text-Slide Video From Script**" task.
4. Launch on Warriorplus. From here you can launch your product on WarriorPlus and start selling it to affiliates.

I'll be adding more training over the coming weeks.

For now, either use Agent X in your existing business, or start on the above steps.

And don't be afraid to reach out if you have any questions!

Thanks!

Chris
